

Burbayar Lodge Herp List

Growing list of species of amphibians (and a few reptiles).

Investigators: Brian Kubicki, Andrew Crawford, Erik Berlin, Larry Gordan, Roberto Ibáñez
with Iñaki Ruíz O.

BATRACHIA:

Caudata:

Oedipina parvipes sp. (collaris without a collar?)

Anura:

Bufonidae:

Atelopus limosus

Cranopsis conifera (formerly *Bufo coniferus*)

Rhinella "margaritifer complex" (formerly *Bufo typhonius*)

Rhaebo (formerly *Bufo*) *haematiticus*

Dendrobatidae:

Dendrobates auratus

Minyobates (*Dendrobates*) *minutus* (Which genus is valid?)

Hylidae:

Gastroteca cornuta

Dendropsophus microcephalus (formerly *Hyla microcephala*)

Hyloscirtus (formerly *Hyla*) *palmeri*

Hypsiboas rufitela (formerly *Hyla rufitela*)

Smilisca phaeota

Hemiphractidae (formerly Hylidae or even Leptodactylidae):

Hemiphractus fasciatus

Centrolenidae:

Centolene prosoblepon

Cochranella albomaculata

C. euknemos

C. granulosa

C. spinosa

Hyalinobatrachium colymbiphylum

H. euknemos

H. fleischmanni

H. pulveratum

Brachycephalidae (formerly Leptodactylidae):

Craugastor (formerly *Eleutherodactylus*) *bufoniformis*

C. fitzingeri

C. gollmeri
C. opimus
C. talamancae
Eleutherodactylus caryophyllaceus
E. cerasinus
E. cruentus
E. cf. cruentus (aka "pop-eyed" cruentus, same as in El Copé?)
E. diastema
E. pardalis
E. ridens
E. taeniatus
E. cf. vocator "vocator de tierras altas" (aka, "peep")

Leptodactylidae:
Engystomops (formerly Physalaemus) pustulosus
Leptodactylus pentadactylus

REPTILIA

Squamata:

Ophidia Serpentes:

Colubridae:

Tripanurgos Siphlophis compressus (the change of genus was suggested more or less recently. However, some like Savage do not recognize this assignment until the publication of an unpublished thesis that has all the evidence)

Sauria Lacertilia:

Family: ? Iguanidae

Corytophanes cristatus

Enyalioides heterolepis (spelling?)-

Anolis poecilophus ?? - the stiped aquatic guy!

Corytophanidae:

Corytophanes cristatus
